Introduction to Sports for Climate Action

Course Goals and Outline

Introduction to Sports for Climate Action is a self-paced online course consisting of four modules and a final assessment. It explores the fundamental connections between climate change and sports, highlights the role of sports organizations in climate action, and presents practical ways to contribute to a more sustainable future.

By the end of the course, participants will be able to:

- Outline ways in which sports both contribute to and are affected by climate change.
- Explain what is at stake and how climate change affects different people and communities.
- Discuss strategies and actions across the sports world that can lead to positive change.
- Identify individual actions that can be taken to make sports greener and more resilient.

The modules of the e-course are:

1. Game Changer - The Role of Sports in Climate Action
2. Greening the Game - Reducing Sports' Carbon Footprint
3. The Climate Playbook - The Climate Playbook - Building up Sports' Resilience
4. Playing for the Planet - The Power of Sports

The estimated learning time is 1 hour and 30 minutes.

Completion Requirements

The Certificate is awarded to participants who go through all the lessons and pass the final assessment scoring 70% or higher within three attempts.
